Compliance Statement

The model is intended as a decision-support tool to identify customers who may be at higher risk of escalation. It should not be used to make automated decisions about customers or determine customer outcomes.

The fairness audit identified material differences in recall and false-positive rates across age bands and product groups. Given the model's limited predictive performance and subgroup variation, deployment should be restricted to **human-reviewed decision support**, with ongoing monitoring and further validation before any wider use.

Group Type	Group	Sample Size	False Positive Rate
Age Band	18-25	14	80.0%
Age Band	26-35	21	75.0%
Age Band	36-45	22	61.5%
Age Band	46-55	23	94.4%
Age Band	56-65	12	72.7%
Age Band	65+	8	40.0%
Product Type	Credit Card	15	80.0%
Product Type	Current Account	30	73.9%
Product Type	Home Insurance	12	87.5%
Product Type	Mortgage	8	75.0%
Product Type	Personal Loan	16	100.0%
Product Type	Savings Account	19	46.2%
